Boštjan Ozimek, Project Coordinator

History of our school

- Certain major historical landmarks proved significant for our school in the past. **The Bleiweis horseshoe school**, the predecessor of our school, was established in 1848 as one of the first Slovene schools in the Austro-Hungarian Empire.
- The **Secondary School of Veterinary Science** was founded in 1947 when New Yugoslavia was formed.
- In 1991, when Slovenia gained its independence, we moved to a new school, located in Mestni Log in Ljubljana - **Secondary School of Agriculture and Food Technology**.
- In 2005 (a year after Slovenia had become a member of the European Union) **Biotechnical Educational Centre Ljubljana** was founded with four schools under its roof.
- Kult316 (in 2015)

Biotechnical Educational Centre Ljubljana

is a **public institution** offering education and research in the field of **secondary, short-term tertiary and adult education** related to biotechnical area (veterinary, food technology, nutrition, environment, biotechnology etc.), hospitality and tourism.
